**To Our Customers:**

Prices quoted in this list are for the wholesale trade only and are based on current conditions, therefore subject to change without notice.

**RATES:**           5 or more trees at the   10 rate.  
                  50 or more trees at the  100 rate.  
                  500 or more trees at the 1000 rate.

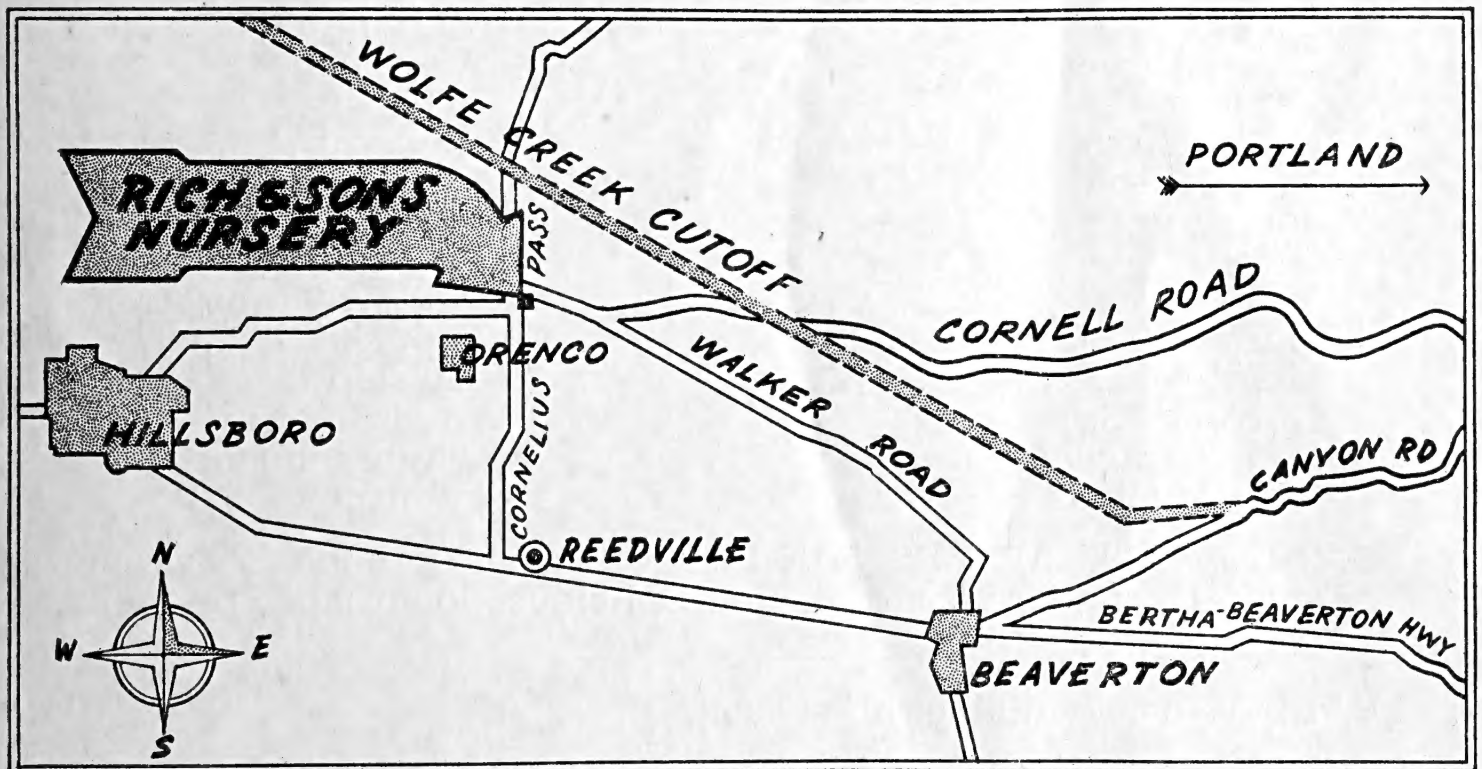

**TERMS:** 3% for cash with order; 2% 10 days; 1% 30 days; Net 60 days. Interest at the rate of 6% may be charged thereafter.

All prices quoted are F.O.B. Packing charges at cost will be added. If the full amount of the order is sent before shipping time packing charges will be waived in lieu of the 3% cash discount.

Grade standards as adopted by the American Association of Nurserymen.

Claims or complaints must be made within 10 days of receipt of shipment. Every possible effort will be made to effect a satisfactory adjustment.

**GUARANTEE:** We guarantee our stock to be true to name and as described. Any stock proving otherwise will be replaced or the purchase price refunded. In no case shall we be liable for any sum greater than the purchase price.

**LOCATION**

Our office, warehouse and sales lot are located 12 miles west of Portland on the Canyon road, and 3 miles north of Reedville at the intersection of the Walker Road and Cornelius Pass Road. Five miles east of Hillsboro.

We have the finest strawberry plants to offer this season. Grown under irrigation to stimulate development of ample root system for early fall delivery.

### ROCKHILL STRAWBERRIES

We have two types of plants. The division type commonly used in the trade. These will be carefully packed to hold their color and good fresh growing condition.

We also have a supply of whole root plants grown by a new process. These have a single crown of about  $\frac{1}{2}$ " or larger diameter completely surrounded by roots. The finest plants to be had. There will be no cut divisions in these.

### STREAMLINER STRAWBERRY

This hardy, new berry, originated in the Wallowa Mountains of northeastern Oregon at an altitude of about 3,000 feet and where the temperature is subject to winter weather as low as 20 and 30 degrees below zero, is remarkable for its many unique characteristics. The strawberries start ripening at the same time the Marshalls ripen and continue (with proper irrigation) through to freezing weather in the fall. They are very large in size and hold their size well during the season. The berries are very firm and stand up on the market better than any other everbearing strawberry we know of. The color is a rich, deep red, making the fruit exceedingly attractive, both fresh and preserved. Streamliners are very sweet, requiring a minimum amount of sugar. Highly aromatic, and astonishingly productive.

They produce runners, which during the course of the season will bloom and produce quite a large crop of berries. It is claimed to be the most disease-free plant known. Patches four years old have been declared in a perfect condition, free of disease and in full production. A long lived berry of exceeding merit.

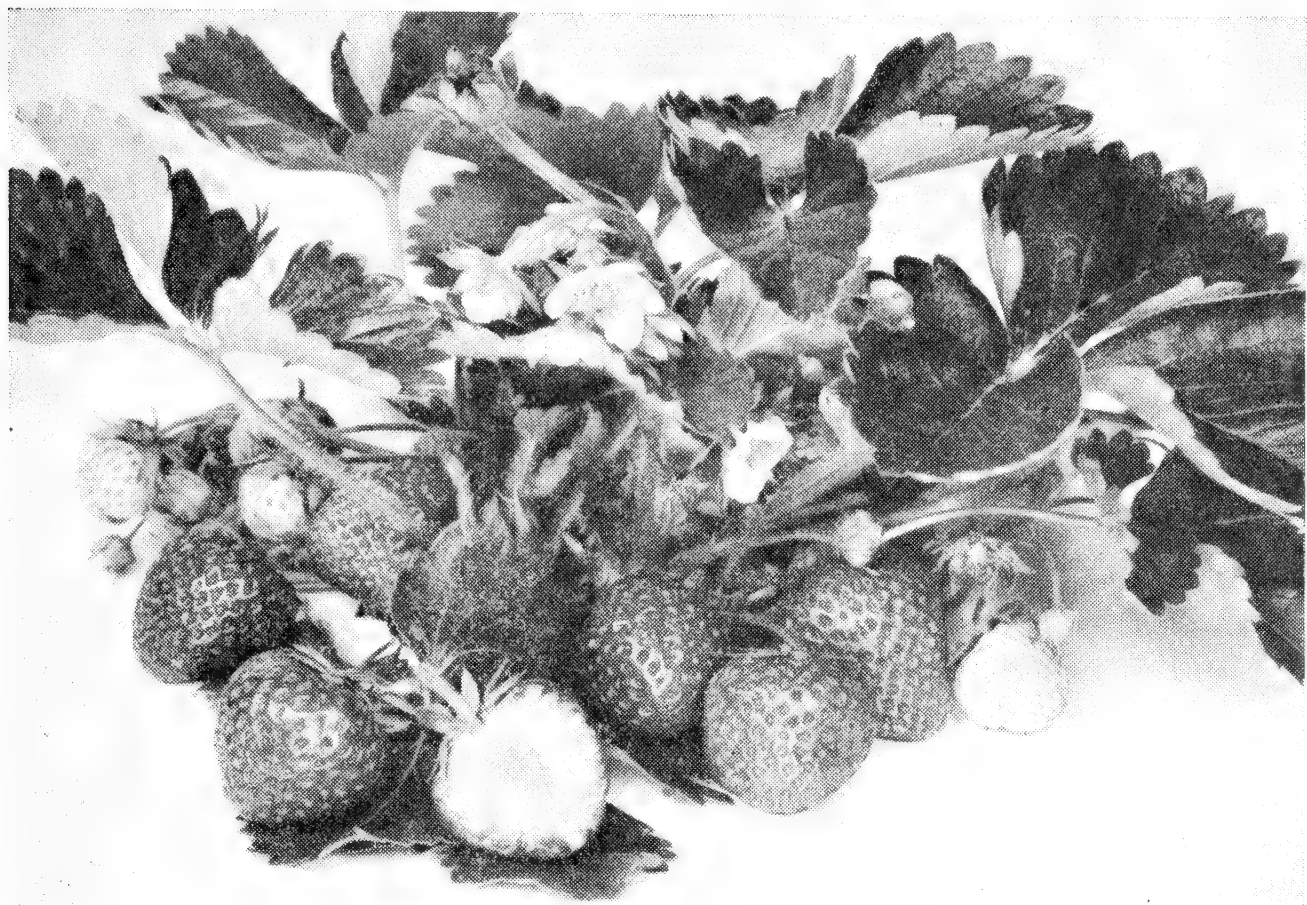

Eastern orders will be filled F.O.B. from a central point in the East.

| 2 yr. ....                                      | .40 | .35 |

**Goldflame Honeysuckle.**

A superlative variety; beautiful, hardy and versatile. The large flamecoral trumpets lined with gold, fragrant after nightfall, appear in immense showey clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it never-the-less flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers.

Allowed to grow naturally, Goldflame will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub, while if planted in a row and sheared it gives a smashing effect as an everblooming hedge.
